

# Benchmarking entre Diferentes Linguagem de Programação ( PYTHON e C# )

*Matheus Maia, Daniel Farias, Lucio Leandro e Frederico Lopes*

- CARGA DE TRABALHO IMPOSTA:

30x

Passos:

- Ler os 2 arquivos e salvar em variáveis
- Multiplicar Matrizes
- Escrever o resultado em 1 arquivo

Python	C#
51.41539645	1.1311896
